

# Building Together!

Florida Gulf Coast  
Chapter

The Florida Gulf Coast Chapter encourages members to do business with the very best contractors, suppliers, and professional associates in the area – other ABC members!

Our ***Building Together!*** program is our way of recognizing those member companies that support and promote this philosophy.

The ***Building Together!*** program promotes and recognizes business relationships and interaction between ABC members on Florida's Gulf Coast. To participate, simply fill out and return the Building Together! Entry Form each quarter listing the companies which your firm did business. ABC will screen out non-members for you. Your company will receive one point for each ABC member listed. Your company will also receive two points for recruiting a new member to join ABC.

Each quarter, the firms with the most Building Together! points will be highlighted in ***Plans & Specs***, our chapter website, and at Monthly Membership Meetings. You will also receive a quarterly award noting this accomplishment. At the end of the year, the companies with the most points will be recognized with the ***Building Together! Company of the Year Award***.

## **Building Together! Guidelines**

1. Each ABC member will compete against other members in their membership category. (Example: General Contractors will compete with other General Contractors)
2. You get 1 point for each ABC member in which your company does business per quarter. However, you may count that same company in the next quarter.
3. If any individual in your company gets a non-member to join ABC, your company will receive 2 bonus points for each company.
4. All quarterly entries must be received by the following dates:

1 <sup>st</sup> Quarter Deadline: April 2 <sup>nd</sup>	2 <sup>nd</sup> Quarter Deadline: July 2 <sup>nd</sup>
3 <sup>rd</sup> Quarter Deadline: October 2 <sup>nd</sup>	4 <sup>th</sup> Quarter Deadline: January 5 <sup>th</sup> , 2009

**Note: You may submit entry forms once a month or once per quarter.**
